Project idea (one paragraph only)

Our project is based on an online desktop applicatione store for home appliances belonging to the Silawi Company. Which enables the customer to purchase from the store, determine the payment mechanism, and know the value of the receipt. The system also allows the manager to control the management of the store, issue reports and account statements, and add new items to the store.

Technology

Technology: Laptop Asus core i7,Laptop HP core i7 , Windows 11,
Database: MySql, and programming language : java) Scene Builder and java FX).
